About Me

Computer Science student with experience collaborating in technical and fast-paced environments across software development and cybersecurity. Recognized for strong analytical and problem-solving skills through competitive programming, as well as for maintaining a structured and team-oriented approach in academic and professional projects. Interested in building reliable and impactful technology while continuously improving both technical and communication skills.

Education

Instituto Tecnológico y de Estudios Superiores de Monterrey

2022 – 2026

B.S. in Computer Science

Relevant Coursework

Data Structures & Algorithms, Computer Networks, Database Systems, Software Engineering, Cybersecurity Fundamentals

Awards & Competitions

- **ICPC (International Collegiate Programming Contest)** — Qualified for the **Mexico National Finals** (Guadalajara, Nov 8, 2025); recognized as **State of Mexico Champion Team**.

Experience

KTSA: KPMG Technologies Services Americas

2022 – 2023

Cybersecurity Intern

- Collaborated with cybersecurity teams in incident response and security event documentation processes.
- Worked in Agile-oriented environments, strengthening communication, adaptability, and cross-team collaboration skills.
- Developed practical understanding of cybersecurity monitoring, incident handling, and professional workflow management.

Projects & Leadership

- **Eating Disorder Detection System (In Progress)** 2026
Developing an NLP-based machine learning model to identify early signs of eating disorders in social media text. Focused on balancing recall and precision for sensitive detection scenarios while following a research-oriented and iterative development approach. (*Python, NLP, Scikit-learn*)
- **Trendify** 2025
Developed a full-stack social media trend analysis platform designed to help businesses identify high-impact topics through data-driven insights. Coordinated frontend visualization and backend processing components while maintaining a user-focused approach. (*React.js, TypeScript, Python*)
- **Cybersecurity Concentration — OT Protection from IT Threats** 2025
Explored security strategies to protect OT environments from IT-originated threats. Practiced security monitoring, pentesting fundamentals, and applied cybersecurity best practices in collaborative technical activities. (*Cybersecurity*)

Languages

Spanish (Native), English (B2 — Cambridge FCE Certified)
